

# From iPads to Smart Boards: What's in Your Teacher Toolbox?

## Presenters:

Jeremiah Fierro: Wiimote Whiteboards

Devin Healey: Flip Video

Tom Johnson: There is an "App for That"

## Wiimote Whiteboards

### What You Need:

1. **Nintendo Wii Remote Controller (wiimote)**

2. **Infrared Pen (<http://penteractive.us/>):**

Infrared Pen with CR1-3N battery upgrade \$10

Wiimote Versiclamp \$10

Hakuba Table Top Tripod \$10

Wiimote Ceiling Bracket – 40 inches \$30

3. **Download Software (Free)** Wiimote Whiteboard v0.3

Mac- <http://www.uweschmidt.org/wiimote-whiteboard>

PC- <http://johnnylee.net/projects/wii/>

### How to use:

1) Connect your Nintendo wiimote to your computer via bluetooth (you may need an adapter if your computer doesn't have bluetooth capabilities). The software helps you connect.

2) Place the wiimote at an angle so the infrared sensor sees the entire projection.

3) Use the infrared pen as a mouse to calibrate your projection. The software helps you do this also.

**You now have an interactive surface for educating!**

## Flip Video

Website:  
[www.theflip.com](http://www.theflip.com)

Uses:  
Record yourself to observe your own teaching behaviors  
Record a colleague as part of a coaching interaction  
Record a student to serve as a self-model  
Record upcoming settings/events to prep students

## There is an “App for That”
