

Preschool: High/Scope Curriculum

■ Outcomes:

DISTRICT will provide research-based curriculum for young children which supports NCLB.

EDUCATORS will use developmentally appropriate, researched-based curriculum that is successful in preparing young children to succeed academically & socially. This curriculum will provide specific developmental information children need to experience during the preschool years.

STUDENTS will be ready to learn in the next school setting.

■ Description of Content/Activities:

This is a comprehensive series of training that can be set up across a school year. Teachers/staff will be trained in the following areas: Active Learning, Key experiences, Learning Environment, Daily Routine, Adult/child interactions, assessment. The curriculum is developed around 58 Key Experiences under the categories: creative representation, language & literacy, initiative & social relations, music, movement, classification, seriation, number, and space.
